

Frozen spaCR encoder pipelines on original expert-labelled fluorescence crops

Epithelial DAPI · 10,000 crops · 7 classes

Yeast native markers · 10,499 crops · 9 classes

SubCell: DAPI + zero protein (epithelial DNA-only ablation); nuclear/bud-neck reference + GFP (yeast).
 Other yeast encoders also use the cytoplasmic marker. All eligible crops and original QC classes are included.
 Crop diagnostics; no patient, plate or gene holdout.
