

Frozen spaCR encoders on original expert-labelled fluorescence crops

Epithelial DAPI · 10,000 crops · 7 classes

Yeast native markers · 10,499 crops · 9 classes

SubCell epithelial input: DAPI + zero protein (DNA-only ablation). Yeast input: nuclear/bud-neck reference + GFP.
All eligible crops and original QC classes are included. Crop diagnostics; no patient, plate or gene holdout.
